**Rajiv Gandhi Science & Technology Commission, Mumbai**

Funded Research Project

"Development of hatchery unit for production of carp fish seed in Rural areas of Hingoli district"

Training Program on

**Induced Breeding & Seed Production of Common Carp**

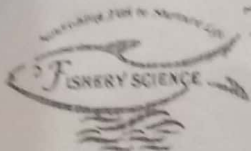

### Program Theme

Hingoli district of Marathwada region has huge potential for fishery activities owing to its vast water resources. The district is endowed with major rivers, reservoirs and numerous water resources such as farm ponds, village lakes, community tanks, etc. Although, these resources provides huge potential for fish production from the district, fish production is very low from the district. One of the reason behind the low fish production is limited fish seed availability.

Considering this, One day Training & demonstration program on Induced Breeding & Seed Production of Common Carp (कॉमन कार्प) सिप्रिनस (माशाचे संप्रेरित प्रजनन व बीजनिर्मिती) was conducted on 24<sup>th</sup> March 2018 in the college. The training was attended by 31 participants including farmers, students as well as researchers. Dr. N. G. Papatwar, Member of BOS, Fishery Science, SRTMU, Nanded and Dr. P. P. Shelke, Senior Scientist and Head, Krishi Vigyan Kendra, Tondapur, Dist: Hingoli were chief speaker for the training programme.

The program was divided into technical session and practical session. Technical session was conducted in the morning session and included theoretical information on biology, induced breeding, incubation, larval rearing and feed management. Afternoon session included practical demonstration of different activities in the Fish seed production unit of the college viz. selection of brooders, hormonal injection, induced breeding, incubation and feed management.

The training program was concluded in the evening with felicitation function wherein participant were given certificate of attendance and informative leaflet on common carp seed production. The feedback regarding the program was also recorder from the participants.
